Subject: Klamath Expert Panels: Update 40
Attachments: DRAFT Report_Chinook Salmon_Klamath Expert Panels_05 02 11.pdf; FINAL Report_Chinook Salmon_Klamath Expert Panels_06 13 11.pdf

Good Morning:

On behalf of the Chinook salmon Expert Panel, thank you all for your participation in the review of the Draft and Final Reports for the Klamath River Expert Panel Scientific Assessment of Two Dam Removal Alternatives on Chinook Salmon.

It has been brought to our attention that several comments submitted during the draft document review period (May 2 through May 12, 2011) had not been received or incorporated into the final document released last Monday, June 13, 2011.

We apologize and respectfully note that it was not the intention of Atkins or the Panel to omit any comments from the final document, including any of the Panel's responses to the comments or resulting edits to the document.

We fully acknowledge and appreciate the level of effort and time devoted to the preparation of the comments, and beginning with this e-mail notification, we are taking corrective action to ensure that all comments submitted during the review period (May 2 through May 12, 2011) are reflected in an addendum to the final document.

If you had submitted comments during the draft document review period (May 2 through May 12, 2011), and those comments had not been incorporated into the General Comments and Responses Table in Appendix C of the final document, we respectfully request that you re-submit those comments according to the instructions provided below.

Please provide notice and re-submit your comments via e-mail to the attention of Karl Osmundson at Karl.Osmundson@atkinglobal.com, and also copy (cc:) John Hamilton at John_Hamilton@fws.gov, before Wednesday, June 22, 2011.

In an effort to resolve further complications and verify the information on record, we ask that those who had previously submitted their comments via e-mail to also provide the original e-mail correspondence that had accompanied your comments. Note that this can be accomplished by forwarding your previous e-mail submittal.

If you cannot re-submit your comments via e-mail, please contact Karl Osmundson for additional direction at (858) 514-1068 or (760) 519-5954 before Wednesday, June 22, 2011.

Also, please note that the document review period had ended on May 12, 2011, and this e-mail does not represent a re-opening of the document comment period or a solicitation for additional comments. Although your interest and participation is greatly appreciated, we cannot accept any new comments on the draft or final document.

Last and for your reference, the Draft Report and Final Report for the Klamath River Expert Panel Scientific Assessment of Two Dam Removal Alternatives on Chinook Salmon are attached to this e-mail and are posted at the Atkins (formerly PBS&J) project website:

<http://northamerica.atkinglobal.com/KlamathRiver/Pages/default.aspx>

Your continued participation in this process is greatly appreciated.

Respectfully,

Karl L. Osmundson
Project Manager/Senior Biologist
